

Efficiently prevents information loss due to the unauthorized use of: USB Storage Removable Drives (flash drives, I-pods, mP3, mP4), CD-RW, DVD, Floppy, and USB Bluetooth transceivers.

In your Network

(LAN, WAN or Wireless, also able to operate on dynamic IP network configurations, or workgroups)

Without blocking non-storage USB peripherals like: printers, mouse, scanners, keyboards, v cams, etc.

USB Lock RP two components system

1) **USB Lock RP (Control)** To be installed in a computer or server, from were the restrictions or permissions are managed.

From the USB Lock RP Control you can:

- Change security measures-
- View and log USB blocked ,and allowed connection alerts (in real-time)
- Make per machine volatile exception for a specific USB storage device.
- Interface with USB Aware (Add-on) Clients (optional).
- View global security (automatically)-
- Generate global and per machine reports-
- Shutdown or re-start any of the controlled stations-
- Uninstall USB Lock RP clients

Note: USB Lock RP control does not need to run from a server-

2) **USB Lock RP (Clients)** Designed to offer active security. USB LOCK RP Clients work as "Windows service" at local machine level. (USB Lock RP clients run at 0% CPU)

For Windows 2000, Windows XP, Windows server 2003, or Windows Vista operating systems
